

Site Assessment Program Hot Sites Briefing  
Meeting Notes  
March 11, 2015

1. Site Assessment Program Focus for next 5 years
  - a. Not likely to find new mega-sites
  - b. Site assessment work focused on:
    - i. Rural eco risks sites
    - ii. Expanding collaboration efforts with states and other federal agencies using Colorado mixed ownership mine sites effort as a model
    - iii. Groundwater solvent plumes (Nationally groundwater plume sites represents the bulk of new sites being proposed to the NPL)
    - iv. Vapor Intrusion in event this pathway is added to the HRS
    - v. Assessing impacts from oil and gas development
  - c. Need to expand groundwater investigation knowledge within site assessment program
2. Site follow-up actions
  - a. Phillipsburg Mining District, MT
    - i. Discuss potential for health risks posed by elevated metals in soils with community leaders and County Health Department to gain support to conduct an assessment of this exposure pathway
  - b. Anaconda Aluminum/Columbia Falls Aluminum (CFAC), MT
    - i. Provide talking points to RA to respond to Congressman Zinke's letter. Ask RA to coordinate response with Governor's office.
  - c. BN Livingston, MT – Discuss withdrawing NPL Proposal with MDEQ
  - d. Darrow/Freezeout. Triangle Abandoned Uranium Mines, SD
    - i. Schedule briefing with RA prior to requesting access, invite OPRA staff to briefing
  - e. Sugarhouse Park Plume Site, UT
    - i. Provide summary of April 1<sup>st</sup> meeting with UDEQ and Salt Lake City to Martin H.
  - f. Ferris Haggerty Mine, WY
    - i. Provide summary of the "next steps" meeting with WDEQ to Martin H.
